**Re last para - This problem is included in the COS Seminar & could be monitored the second week of November.*

1 to 3: I think Dr. Tietjen and [redacted] of his staff should see this - they have an interest in related problems. While the operational aspects are very important, I feel the physiological one are impressive - and only a doctor can give them the weight deserved. Just a thought!

3-4 Do you have any suggestions as to how we should tackle this?
