CONFIDENTIAL

1. Pursuant to a recommendation of the Long Range Planning

Committee the DCI has established an Instructional
    Ex. Dir./Compt.
    DDS
    Agency

Systems Task Force (ISTF) to investigate new techniques of instruction

and to evaluate existing methods in the hope that more efficient means

may be found to meet the ever increasing and complex training require-

ments of the Agency.

2. The ISTF will determine the state-of-the-art in such media as

Programmed Learning, Programmed Instruction, the "teaching machine,"

Computer Aid to Instruction and recent developments in the Visual,

Graphics & Display areas. It will then make recommendations as to the

feasibility of applying such techniques to the training requirements of

the Agency.

3. Concurrent with its study of the state-of-the-art the ISTF will

attempt to evaluate and validate Programmed Instruction currently used

by OTR and, on request, perform the same service for other components

of the Agency which are using or wish to experiment with these media

of instruction.

4. Initially the ISTF will be composed of but not limited to teams   25X1A

from OTR/DDS and ORD/DDS&T under the chairmanship of ███████

████████████████   25X1A

5. Inquiries may be directed to: ██████████, Chairman ISTF, Room 514,

1000 North Glebe Road, Extension 2244 or to ████████████   25X1A

25X1A

Administrative Assistant, ISTF, Extension 2193.
