1 July 1967

MEMORANDUM FOR: Assistant Deputy Director for Plans

SUBJECT : Conference for Federal Science Executives

1. The Brookings Institution is conducting a Conference for Federal Science Executives in Williamsburg during the period 3-8 December 1967. It is a conference that I would like to attend.

2. The conference is conducted by a member of the Brookings staff and uses the services of special consultants and nationally prominent academicians and executives from public and private life as speakers. It seeks to broaden understanding of major policy-making and to develop approaches leading to more effective administrative decisions and actions.

3. I also feel that CIA should be occasionally represented in forums such as these, in order that distortions of our "image" be coped with. I plan to go as a CIA officer, ostensibly dealing with the analysis and collation of scientific information. Needless to say, there will be no occasion to even allude to CS activities or problems.

4. With your concurrence I will submit my application to the Training Selection Board.
