PHOTO INTERPRETATION BRIEF

Title:
Recent Changes on Vozrozhdeniya
and Konstantin Islands, USSR

Geo Coords:
45-03N 59-13E
NPIC Target No:
0246-7

Publication No:
NPIC TR-659-64
Date:
July 1964

References: USATC, Series 200, Sheet 0246-16A (S)
NPIC Project N-766 (64 (T1-10)

The quality of recent photography makes possible a comparison of facilities on Vozrozhdeniya and Konstantin Islands with those observed on photography

Photography of was obscured by so much snow cover that an accurate comparison was not possible.

NPIC/R-659/64

The following changes were noted (Figure 1):

1. The grid and two deep water piers on Konstantin Island, 3 nm south of Vozrozhdeniya Island, have disappeared.

2. Only 6-8 vehicles were visible at the Mys Kokchukat Headquarters and no aircraft were visible on the runway pattern.

3. A circular pattern 300 ft in diameter was visible at Grid 2 of Test Site 5 in the south-central portion of the island. The faint grids in this area have not been visible since the large-scale coverage []

4. The large new grid in the western part of the island discovered [] showed a new building at the field control point and several

new roads approaching the control point.

5. A new building and additional traffic activity were visible at the new test site discovered [] south of the runway pattern.

6. Dark stains were visible in the animal pens at the north end of the Kantyubek Laboratory.

7. A cargo ship approximately 150 ft long was tied up at the main pier at Mys Kokchukat.

8. A high-standard road is under construction between Mys Kokchukat and Kantyubek Laboratory.

9. In general, the road system over the island shows continued heavy use.
