is located 1.8 nm southwest of the field site, and is oriented on an azimuth of approximately 220 degrees.

The fixed field site (Figure 2) consists of 4 offset in-line launch positions oriented on an azimuth of approximately 220 degrees. On the first good quality coverage in

the site appeared to consist of 2 launch positions on a double loop road pattern. Good quality photography of

25X1D

disclosed the launch positions to have been moved somewhat, with 2 additional launch positions added. Several unidentified structures were observed adjacent to each of the internal launch positions. Excellent quality photography of

disclosed no apparent changes. The northern launch positions are 440 feet apart and the southern launch positions are separated by 560 feet. No activity was observed at the field site.
