

IAD/OSS - 251/65
7 September 1965

MEMORANDUM FOR: Assistant for Plans & Development, NPIC

ATTENTION : Chief, Development Branch, P&DS

FROM : Chief, Imagery Analysis Division, CIA

SUBJECT : "Model II" Bausch & Lomb Variable Magnification
Tracing Projector

25X1A

1. At the request of [REDACTED] we have reviewed our anticipated requirements for a "Model II" Bausch & Lomb Variable Magnification Tracing Projector having a magnification range of approximately 7X to 30X. Our substantative branch chiefs have determined that at this time we do not have sufficient justification for requesting this development.

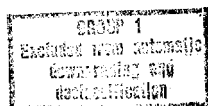

2. The prototype Bausch & Lomb Tracing Projector, Model I, which has been "in-house" for several months, is satisfactorily performing the functions for which it was designed. Presently, we do not have a need for additional units of this type, however, an increase in requirements may necessitate additional instruments at a later date.
