

STAT

[redacted]

Inasmuch as I shall not be with the company after 31 March, I do not feel I should comment in any way which commits us to a change of direction - I will be in no position to assist in working it out. Therefore, I return this to you with my kindest regards: rots of ruck.

STAT

[redacted] phoned me last week and recommended a report which has a bearing on the GEMS program:

Technical Research Report 11-50
U. S. Army Personnel Research Office

"Development and Evaluation of a Catalog Technique for
Measuring Image Quality", [redacted]
[redacted] August 1966.

AD 645 644 (Library can get this for you quickly)

STAT

STAT

Sounds like you should read it - according to [redacted] it pretty well establishes uniqueness. If so, then we can proceed to the pseudo-GEMS without waiting for the test results. Perhaps we can save some money after all.
