Washington 25, D. C.

Dear [REDACTED]

Referring to the conference at our premises on September 23rd, we wish to confirm herewith the following changes we have agreed upon in the specifications of contract [REDACTED] issued on 28 June, 1960:

1. Eliminate step and repeat.
2. Improve positive and negative drive.
3. Change negative loading station so that reels are positively locked.
4. Provide more room under spools on positive and negative spindles to facilitate loading and unloading.
5. Change tension idlers to positive lock type.
6. Provide automatic tension idlers for flat belts.
7. Provide 70 mm negative head assembly with proper condensers, light source and objective lens with design facility for inter-changing heads for 35 mm and 16 mm negative formats as optional and extra units at a cost of [REDACTED] each.
8. Provide interchangeable drive roller design.
9. Provide the necessary design to permit use of enlarger as reduction flow camera.
10. Provide three (3) interchangeable negative aperture slits.
11. Redesign negative position carrier to improve flatness of focal plane.
12. Provide improved main motor drive, remounting to reduce vibration.

In lieu of the above changes, an additional 60 days will be required to complete this item as stated in the original contract.

DECLASS REVIEW BY NIMA / DoD

Very truly yours,
[REDACTED]

STATOTHR

1. The [REDACTED] 4X Continuous Flow Step and Repeat Printer shall be re-designed to incorporate the necessary flexibility to accommodate the best lens for the purpose and allow the possible use of other focal length lenses to change the magnification ratio for 35 m/m and 16 m/m film.
2. This flexibility will permit the possible use of the Printer in both the Step and Repeat and Continuous Mode by the interchange of proper drive rollers.
3. To accomplish items 1 and 2 above, the re-design will permit the negative and lens planes to be moved into proper principal planes for the various magnification ratios dictated by the focal length of the lens selected.
