

INSTALLATION

The machine is delivered to you completely assembled. A pre-leveled floor is not required. Installation is quick and easy. All you have to do is hook up a hot and cold water line, bring in the electricity, mix your chemicals — and you're ready to roll.

STATEMENT OF POLICY

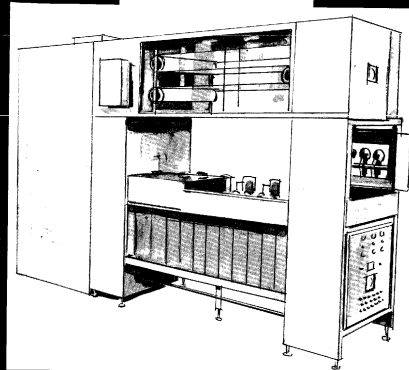

The simplicity of design and the rugged construction of all Simplex Processors assure consistently dependable performance. Expert service personnel is ready to assist you in every possible way. Spare parts are always available for overnight air freight delivery from our Hackensack, N. J. plant.

The Simplex line for custom labs and photo finishers includes over 60 models of flexible standard and custom-made machinery designed for use with any paper, film or chemicals.

Simplex pledges to continue the same reliable and conscientious service which is so much appreciated by all owners of Simplex Equipment.

Call or write for additional information. If you think you have a problem we will be glad to help you solve it.

Imagine —
Dependable Quality
Color Equipment
takes just 30 sq. ft. of
floor space —
in the middle
of a room —
without any
wall construction

S

Simplex

At last ! The ideal Automatic Roll Paper Color Print Processor for the user of continuous rolls up to 16" wide AND cut sheets up to 16" x 20". Requires only 10 ft. x 3 ft. of floor space: includes automatic processor, dryer, replenishment system and loading darkroom. Place it anywhere — no wall space required for tanks and electrical panels. Most economical to operate. Designed for your present needs and anticipates your future growth.

No Extras ! Amazing low price includes everything you need to start turning out bright sparkling prints. Processor, replenishment system, water and chemical temperature regulation — even the dryer is included. To top it off — a light-tight loading room is part of the package.

VERSATILE

for continuous rolls AND single sheets.
More than 200 8 x 10" prints per hour.
No conversion required for resin coated paper. Air dryer is on the machine when you get it.

LARGE QUANTITY PRODUCTION

Speed: 16" per minute for one 16" roll or two 8" rolls, or other combinations

ALL AUTOMATIC:

Clip-on dry paper, clip-off dry prints. Temperature control, recirculation and replenishment are fully automatic and are constantly guarding the high, uniform quality of your output. Temperatures are maintained precisely and easily read on a large dial thermometer.

COMPACT CONSTRUCTION —

Sturdy metal frame supports tanks made of easy-to-clean, non-corrosive PVC.
