MEMORANDUM FOR: Chief, Plans Branch, P&DS

SUBJECT: Printing on Duplicating Stock Wider than Original

25X1A

1. Information has been received by [redacted] the contract monitor of the Universal Data Block Reader, that the 35mm Stellar material is being printed on 70mm wide stock (G³ and J³) for all use other than TID measurement processes. Also, the 8" original from the 116A Type II is reported to be duplicated entirely on 9 1/2" stock. These procedures directly and seriously affect design parameters of the Data Block Reader.

2. It is requested that the above information be verified and if factual, the following determination should be made:

a. Can the duplicate material be printed binary edge to binary edge (data block edge) and can this registration be held to 0.015" tolerable film wander?

25X1A
25X1A

b. What effect this edge to edge printing will have on operational users (TID, DIA - ACIC - [redacted] and AMS - [redacted]?)

c. What is required to have [redacted] do this?

25X1

25X1A

3. For additional information or details concerning this request, please contact [redacted] P&DS/DB.

25X1A

[redacted signature box]

Chief, Development Branch, P&DS
