Bob

Your question comes at a most propitious time. Here, fresh off the interference microscope, is a fringe picture of the grooves. We have not yet made replicas but the results so far are, to our eyes, beautiful. Therefore I have confidence in suggesting the second week in May for a West Coast gathering of the class. (week of May 10)

As for route I have no preference. There are non stop flights from Dulles to S.F., whereas from [redacted] it's strictly through Chicago. I leave it to you.

Bob.
