STATINTL

Gentlemen:

STATINTL

is submitting an unsolicited technical and cost proposal for the development of a change detector. The program, as described in Enclosure (1), entails an 18 month period for the design, fabrication and evaluation of a change detector for use as a screening device to aid the photo interpreter. This device will consist of a console containing a comparator and display unit. The comparator unit will contain the necessary components to perform the functions of automatic registration and comparison of image data from 70mm roll film. The display unit will provide the components required to display the scenes being compared as well as the change display, and the controls required to operate the console.

STATINTL

The proposed program is the logical follow-on of the work performed for

The proposed program has been prepared by the same persons who accomplished the major objectives of the referenced contract. They will also be responsible for accomplishing the objectives of this program.

STATINTL

STATINTL

The total cost of the program is and is based upon a cost-plus-fixed-fee type contract. We anticipate a contract start date of 15 June 1962 with delivery of the model 18 months later. Our usual terms of net 30 days, F.O.B., will apply to this estimate. Our quote will remain firm for a period of 60 days.
