25X1A

This bi-monthly status report covers the period from August 22 through October 21, 1969. During this period two trips were made to the Customer's facility, as follows:

September 8, 1969: This trip was concerned with a review of both the philosophy, and a preliminary outline, of the handbook.

October 21-22, 1969: This trip was concerned with delivery and review of three items; a detailed outline and chapters 1 and 2 of the handbook. Also, a complete chronological record of "message traffic" for both "C" and "G" was finalized for inclusion in the handbook.

Trip reports covering each trip have been submitted.

During this period work has been concentrated on Chapter 1 and 2 of the handbook, from the standpoint of both content and format. The proposed handbook will not be a "cookbook", but will provide a technological basis for understanding the image evaluation process in terms of its component parts and their inter-relationships. It will also establish those areas of evaluation which require further investigation.

**NOTICE**

THIS MATERIAL CONTAINS INFORMATION AFFECTING THE MEANING OF THE ESPIONAGE LAWS, TITLE 18, USC, SECS. 793 AND 794, THE TRANSMISSION OR REVELATION OF WHICH IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED.

The primary emphasis during the coming period will be on Chapter 3. It will be attempted in Chapter 3 to define, in terms of flow charts and descriptive material, the sequence of event and techniques which constitute image evaluation.
