NPIC/TSG/RED-298-70
18 December 1970

MEMORANDUM FOR: Chief, Operations Division, IEG/NPIC

ATTENTION :

SUBJECT : Stereo Scanning Utility Study

1. It is requested that the members of the IEG Coordinating Committee for the subject utility study review for content and format the [redacted] questionnaire [redacted] forwarded under separate cover to Mr. [redacted]. The questionnaire is a smooth DRAFT version developed by the [redacted] from the outline generated by the Coordinating Committee, the contractor, and the TSG/RED Project Officer at the 28 October 1970 meeting in IEG.

2. The questionnaire is designed for eventual submission to IEG Section Chiefs. The answers to the questionnaire are required to assist the [redacted] in the compilation of various Test Packages, with which the Stereo Scanning Utility Study tests will be administered to IEG photo interpreters. Furthermore, many of the answers are necessary (along with available MIS data) to analyze the potential costs and benefits of automated stereo scanning. This analysis will take place during the course of the test phase of the Utility Study and is a major product of the study for the purpose of assisting NPIC management decisions regarding the continuation of Automated Stereo Scanner development.

3. As agreed at the 10/28/70 meeting, we wish the members of the IEG Coordinating Committee to review the attached draft version prior to our submitting the final version for response by your section chiefs. The committee's comments and recommendations, to be incorporated in the final version, are requested by 8 January 1971. You may use MIS #610069BA and call upon [redacted] for additional guidance.

[redacted]
Chief, Research & Engineering Division, TSG
