19 March 1969

MEMORANDUM FOR: Chief, Plans and Programs Division, PPBS
THROUGH : Chief, Development & Engineering Division, TSSG
SUBJECT : Advanced Stereo Rhomboids, Model II

Gordon:

I am forwarding a copy of the Contract Inspection Report on Advanced Stereo Rhomboids, Model II, and would like to have you pay particular attention to the new delivery date and its impact upon follow-on production versions. I have discussed the problem with the project officer, and we do feel that through negotiations with the manufacturer that we may be able to speed up the delivery of the production units, thereby taking out some of the slack. Estimates of the amount of time that can be saved will have to wait for additional information from [redacted] Please also note the potential overrun which we have flagged in this report. The official copy will reach you through normal channels at a later date.
