

~~SECRET~~HTA-42-57 (OC)  
25 March 1957MEMORANDUM FOR THE RECORDSUBJECT: Visit of Two SAC Representatives to HTA  
on 14 March 1957

1. Following a meeting at H Street on 13 March with the two SAC representatives, AFOIN representatives and Project representatives concerning the R & D program for PI and PG equipment to exploit T photography, the subject visit occurred. AFOIN representatives were informed on 13 March of the intention of the SAC representatives to come to HTA on 14 March. No AFOIN representative sat in on the subject meeting.

2. It was apparent from the visit of the SAC representatives that certain HTA materials had not yet been received by SAC. Only two of the HTA Accession Lists of T Reports had been received although some six have been produced. The SAC representatives noted the missing report numbers. The SAC representatives also indicated that they received only the dupe positives of T photography and that they hadn't seen any plots, mission coverage summaries or other related reports produced by HTA.

3. The foregoing is in no way intended to produce any discord between SAC and AFOIN but to point up the fact that some HTA materials which SAC apparently would like to have are not reaching them at all or only after considerable delay. HTA produces enough copies of all of the needed material to meet SAC's requirements but beyond recording this situation, HTA intends to do nothing more in this matter unless properly ordered.
