DECLASS REVIEW by

NGA/DOD	INITIALS	DATE	REMARKS
DIRECTOR			<i>AL:</i> <i>FYI attached is a copy of my original comment on the project-- which still holds. Also attached is a later paper (26 May) from [redacted] which I believe is related-- although frankly it is hard to see how. The original report offers very little-- if anything-- of use to us; it is not a good piece of work in my opinion. I think [redacted] (REO) realizes this, but does not want to let the project die and is therefore trying to move it into new areas. I have discussed the 26 May paper with him and am awaiting some feedback which may or may not be forthcoming. Again frankly, I see little of value here for us-- definitely nothing for [redacted]. I hope this "project" will die.</i>

SPEED LETTER

TO : Chief, TSSG

FROM: Chief, PPBS

ATTN:

SUBJECT: MID-1970's Photointerpretation
Workstation Concepts

1. The subject report and the summary paper, DK-501, have been reviewed by PPBS, and we are prepared to discuss the report with at his convenience.

2. Two of the concepts (Nos. 2 and 3) now appear to be completely unacceptable for a variety of reasons, including the associated assumptions, risks, and costs and the lack of definition surrounding ADP implications. The third concept (No. 1) reflects an expanded (too much so, we think) approach already considered and being implemented in an experimental mode.
