PSG/AID-255/70
4 September 1970

MEMORANDUM FOR: See Distribution

SUBJECT: IIS Training Attendance

1. The IIS Training Program was conducted in two identical phases, Supervisory Level training from 25 May through 30 June 1970 and Working Level training from 29 June through 2 September 1970. There was a total of 72 hours of classroom instruction given during the Supervisory Level training and 160 hours during the more heavily subscribed Working Level training. In addition to classroom training, six of the nine courses taught included tutorial hands-on machine practice following the classroom sessions.

2. A statistical summary of total attendance by subject is as follows:

    a. IDF/1 hr./23 classes/304 students.

    b. Query Introduction/1 hr./23 classes/297 students.

    c. Simplified Query/1 hr./14 classes/188 students.

    d. Forms/2 hrs./15 classes/248 students.

    e. DEN/2 hrs./4 classes/52 students.

    f. VEA/4 hrs./10 classes/94 students.

    g. PIRL/4 hrs./10 classes/108 students.

    h. BQL/6 hrs./7 classes/78 students.

    i. OUD/4 hrs./5 classes/47 students.

3. Attachment A is a listing of IIS Training course objectives and hours of each course.

4. Attachment B is a detailed statistical breakdown of class attendance by component and by phase, Supervisory or Working Level. Also included are totals by phase trained in each subject.

Declass Review by NGA.

SUBJECT: IIS Training Attendance

    5. Attachment C is a list of students by components who completed
training in the various subjects. In those subjects that included
machine practice a letter "P" after the student's name denotes those
who attended practice and demonstrated a machine understanding of the
subject. Those names without the letter "P" completed the classroom
instruction but did not attend machine practice.

ATTACHMENT A

IIS TRAINING COURSE OBJECTIVES

INSTALLATIONS DATA FILE (IDF)

To become familiar with the structure and contents of the IDF. (1 hr.)

QUERY INTRODUCTION

To compare IIS query languages and the considerations governing their use. (1 hr.)

SIMPLIFIED QUERY

To formulate and transmit to the computer simple, one-statement queries against the IDF. (1 hr.)

IIS FORMS

To complete and/or utilize the IIS worksheets during the processing of a given mission. (2 hrs.)

DATA ENTRY (DEN)

To enter in the Working File target readouts recorded on IIS worksheets. (2 hrs.)

VERIFY, EDIT, AND APPROVAL (VEA)

To verify, edit, and approve target readouts before they are entered in the IDF. (4 hrs.)

PHOTO INTERPRETATION RETRIEVAL LANGUAGE (PIRL)

To formulate and transmit to the computer a limited range of detailed queries (to the IDF) consisting of more than one statement. (4 hrs.)

BATCH QUERY LANGUAGE (BQL)

To formulate and transmit to the computer a wide range of detailed queries (to the IDF) consisting of several statements. (6 hrs.)

IDF MAINTENANCE (OUD)

To update and/or modify the contents of the IDF. (4 hrs.)
