*** NOTICE TO USERS ***

The COMIREX Object Target List (OTL) of the National Imagery Exploitation Target Base (NIETB) is maintained in the National Photographic Information Center (NPIC) by the office of the file coordinator (NPIC/PSG/RSD/IB, room 6S100, [redacted]).

25X1

The OTL is an extract of the Object Data File (ODF). Non-published portions of the file include references to reports on individual objects and expanded descriptions of individual objects. The complete file is available to NPIC users on-line (UNIVAC 494 computer system) and to community users on COINS. Users' manuals and object classification manuals (for category codes) are available in the office of the file coordinator.

NATIONAL IMAGERY EXPLOITATION TARGET BASE
(NIETB)

OBJECT TARGET LIST
(Supersedes Dec 1977 Edition)

OBJECTS, WEAPONS, AND WEAPONS SYSTEMS

There are four primary identification elements used to identify objects, weapons, and weapons systems of intelligence target interest. These elements are object identification number, category code, authorized designation or target name, and description. In the attached list the object targets are arranged in two ways: in object number order and in alphabetical order by authorized designator within each functional category. Five additional identification elements are also included to facilitate positive identification of objects. These are alternate designation, producer country, user country, reporting component of the agency responsible, and security classification. Identification elements for each object in this target list have been provided initially by the organization responsible for the object under the National Tasking Plan. Additions, deletions, or changes to this list will be made through the COMIREX Exploitation Subcommittee.

From left to right across each page the following data headings will be found on the object target list:

IDENTIFICATION NUMBER:	A three-part number. The first is a two-digit general category code taken from the functional category codes. The second is a four digit code assigned sequentially to objects within a category. The third is a two digit suffix which can be used together with the first two codes to identify a single or individual object within a class or type. Example: 61 aircraft; 61-0005 - FITTER A SU-7 FIGHTER JET; 61-0005-01 - FITTER A SU-7 BM FIGHTER JET.
CATEGORY CODE:	See next page for the code key.
AUTHORIZED DESIGNATOR:	The official name for the object. Example: FISHBED G.
ALTERNATE DESIGNATOR:	A nickname or less precise name than the authorized designator. Example: MIG-21.
DESCRIPTION:	A brief descriptive phrase. Example: Fighter jet VSTOL.
PRODUCING OR USING COUNTRY:	Self explanatory: country codes are taken from the Basic Encyclopedia.
NTP ASSIGNMENT:	The NTP Functional Area and agency to which the object is assigned.
SECURITY CLASSIFICATION:	SECRET/NOFORN and below or TOP SECRET/NOFORN as indicated. This file cumulation is classified TOP SECRET/NOFORN. Individual objects with an "SN" in the security classification field are classified SECRET/NOFORN or below. When used in a report, data on an individual object may be classified less than SECRET/NOFORN depending on the source of the information used in the report.
