NEWS LETTER

1. The first of the Area Desk (Personnel Branch) representatives to visit an area on temporary duty, recently returned from [redacted] 25X1A6a  
Another such individual departed for the [redacted] Area in mid-July and 25X1A6a  
has just returned. In the near future other Area Desk representatives  
will visit their assigned areas with the objective of a closer understand-  
ing of the area and its problems. I welcome your comments on these  
trips.

2. Complete production of 2ST (Class "C") Mobile Units has been  
received from the manufacturer minus transmitter URT-11. Latest  
information from the manufacturer indicates that delivery of the trans-  
mitters will commence in September.

3. The 6ST (Class "B") Mobile Unit is now under contract and the first  
trailer frame assembly will be inspected early in September. Progress on  
the production to date has been very satisfactory and first unit delivery  
still appears possible by the end of the year. At this writing, the only  
delays foreseeable are those which may occur through non-delivery or  
insufficient delivery of certain Government furnished items. These  
items include Control Unit CP-4, Antenna Coupler TAC-1, and Multi-  
plex Control Links.

25X1A

6. At long last, four of the much heralded AFSAM 7 machines will be  
delivered to us in October. At that time, we can begin local testing and  
determine the specific procedures required for our use. However, do  
not look for their utilization in the field before next year.

25X1A2d1 7. A new development model of CIFAX equipment (enciphered facsimile) is being locally tested between two KUBARK offices. This equipment has been approved [REDACTED]. If this test proves satisfactory, the use of the equipment may be expanded to serve other offices both here and in the field. Here again, production models will not be available until 1956.

10. No doubt most if not all, of you have heard about the drastic personnel ceiling and budget limitations imposed by Congress. For FY-54 and 55 we are limited personnel-wise to the number we had on duty as of mid-night 30 June. This means that no additional commitments can be undertaken unless we are relieved of present duties. This means that if a project requires five additional people another project or projects must be reduced that number. It is appropriate therefore, that each activity be reviewed to determine whether or not every slot presently filled is absolutely necessary. This, you should do with a very critical eye. If you find an activity that is not fully productive and absolutely essential, please let me know. There is no "fat" unless you can, by this critical review, bring it to light.

11. The Company is restricted budget-wise for FY-54 and FY-55 to the amount obligated in FY-53. This means that we will not be able to procure equipment other than that necessary to maintain existing facilities. It also means that we will have to curtail travel to some extent. We have been given a specific amount from which we must meet all of our commitments. There is no "kitty". If we watch our operations carefully and increase the efficiency of our management. I am sure that we can continue to carry out all the things that are absolutely necessary. I request your whole-hearted cooperation to carry out our commitments to our customers and still live within our means.
