## INTRODUCTION

This brief has been prepared in accordance with NPIC responsibilities for third-phase imagery exploitation under the National Tasking Plan.

## BASIC DESCRIPTION

Although SAM Site E12-1 was a projected location for an ABM launch complex, there is no evidence on small-scale KEYHOLE photography that actual construction of the complex was ever started.

Only minor changes are observed in the support area, and no change at all can be seen at the support buildings associated with the planned ABM launch complex. Only two of the three multistory apartment-type buildings observed under construction in 1965 were completed. In the section of the support area associated with the SA-1 site, two buildings have been removed.
