PHOTOGRAPHIC INTELLIGENCE BRIEF

CIA/PIC

INSTALLATION:	Fluorspar Mining Activity	BRIEF NO.:	B-32-58
LOCATION :	Chimbargatinsk, USSR	DATE :	8 September 1958
B. E. NUMBER:	None	LAT. :	41° 38' N
WAC NUMBER:	328	LONG. :	69° 55' E

PHOTO DATA:

25X1D

MAP DATA:

AMS. Series N502, Sheet NK 42-8, Nov 1957, 1:250,000 (U).

REQUIREMENT RR/HTA/E/R21/58: Locate and describe fluorspar mining activity which reportedly exists at Chimbargatinsk, in the basin of the Ugam River, approximately 65 kilometers northeast of Tashkent, USSR.

REMARKS:

A photographic search was made of the terrain for 10 kilometers on each side of the Ugam River between its junction with the Chirchik River at Khodzhikent and a point 25 kilometers upstream. There is no evidence of ore processing or significant mining activity at Chimbargatinsk or elsewhere in the area scanned. The only apparent mining activity is a small strip mine located three kilometers west of Khumsan, a small town near the mouth of the Ugam River.
