AREA STUDY  
SIAULIAI-KAUNAS, LITHUANIA

This memorandum is for record purposes only. No distribution will be made.

Requirement DP-HTA-R5-57 requested a photographic study of the area between Siauliai and Kaunas, Lithuania to determine location of large industrial or military installations, major changes in vegetation, forest cover, cultivated land areas, swamps, roads, railroads or other significant features.

Twenty maps (scale 1:50,000) covering approximately 2200 square miles, were carefully evaluated on the basis of [REDACTED] Overlays 25X1D of each map were prepared to show all significant changes.

Following a study of the individual overlays in cooperation and consultation with the requester, the major significant changes were annotated directly onto a 1:250,000 map formed by joining AMS Map Series M508, Sheets S55 and S56, and AMS Map Series N501, NO-34-12. A sketch map of Liepaja at 1:35,000 scale, based on [REDACTED] and a sketch 25X1D map of western Lithuania at 1:1,000,000 scale, based on World Aeronautical Charts, were prepared, as requested, for general orientation and briefing purposes.

In addition, the requester, working in the Talent Center with the P.I. analyst, prepared a written detailed description of the selected area.
