USATC, Series 200, Sheet 0156-13HL, 3d ed, Jun 63 (S)

An explosives and ammunition plant is located 2 nm NE of Nizhniy Tagil. The plant, which is heavily secured by a wall, a cleared perimeter and patrol road, and a probable outer fence, consists of an eastern area and a western area.

The eastern area contains 4 large and 18 small buildings, all of which are revetted. The facilities in this area probably produce primers, detonators, and other types of sensitive explosive devices.

The western area contains approximately 55 buildings, including 6 large revetted production buildings, 12 small revetted buildings, a loading line building, and a steamplant.

A 15- by 1-nm test range, oriented E/W, is located 7 nm south of the plant and may serve as a test facility for munitions produced at the plant. It is interpreted as a range where small tactical rockets may be tested.
