WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

NATIONAL PHOTOGRAPHIC INTERPRETATION CENTER

NAME

Leningrad Southwest AMM/SAM Launch Complex, Changes and Addi-

25X1D

tions, [REDACTED]
COUNTRY

GEO COORDINATES

25X1D

USSR 59-43N 029-18E [REDACTED]

25X1A

25X1D

The complex is observed on good-quality, stereo KH-4 KEY-
HOLE photography. Significant changes and/or additions since

25X1D

[REDACTED] include: construction of a loop
road along the complex main road opposite the access road to
Launch Site A (trees had been cleared at this location in [REDACTED]
[REDACTED]; a new ground scar extending from Launch Site C toward
the Support Area; construction activity midway between the Com-
plex Control Center and the NW outrigger position. This latter
activity consists of possible preparation of a fourth position
for the Electronic Site under construction and additional tree
clearance.

25X1D

Vehicles/pieces of equipment are located on the perimeter
road in the vicinity of at least 5 of the missile-ready build-
ings of Launch Site E. Several were present in [REDACTED] but
changes in their positions have occurred since that time.

25X1D

There appears to be an erector/launcher at the launch
point of each launch position of Site E. Small photographic
scale precludes confirmation of their presence.
