WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

Approved For Release 2001/11/19 : CIA-RDP78T04759A003400010012-7

## PREFACE

This report lists the order of battle information on all active intelligence targets imaged on the photography of this mission.

Targets are arranged in sections according to type of order of battle information present (Missiles, Air, Naval, Ground, Electronics, and Miscellaneous) and within the sections 1) by country, 2) within the country by WAC area, and 3) within the WAC area by geographic coordinates in ascending order. The map base used (when available) for the derivation of coordinates is the latest edition of the US Air Target Chart, Series 200.

The header line for each target contains, reading from left to right, the target name, the geographic coordinates, the World Aeronautical Chart number, the Bombing Encyclopedia (BE) number, and the NPIC target number.

Photo reference data includes all photo references, and symbols denoting limiting conditions, photo interpretability, target coverage and the mode.

Symbols for limiting conditions affecting photography are C (Clear), SC (Scattered Cloud Cover), HC (Heavy Cloud Cover), H (Haze), CS (Cloud Shadow), S (Snow), O (Obliquity), SD (Semidarkness), GC (Ground Cover), CF (Camouflage), and GR (Ground Resolution).

Interpretability of the photography is categorized as G

(Good), F (Fair), or P (Poor). Target coverage is denoted by the symbols T (Total) or PT (Partial). The mode of coverage is indicated by ST (Stereo), NS (Non-Stereo), or PS (Partial Stereo).

Passes where no OB was observed are not referenced in this report.

When photographic scale and quality of image resolution permit, aircraft are identified by their NATO names, i.e., FAGOT, BADGER, BEAR, etc. In cases where identification by type cannot be made, aircraft are reported according to the classification shown in the table below.

Classification	Wing Span (ft)			Helicopter Rotor Diameter (ft)
	Straight	Swept	Delta	
Small	0- 70	0- 40*	0-35*	0- 40
Light	71-110	41- 70	36-50	41- 60
Medium	111-150	71-130	51-70	61-100
Heavy	over 150	over 130	over 70	over 100

\*In these two categories, fighter aircraft are further subdivided when possible: those in the size range of the FAGOT/FARMER are termed small; those larger are termed large.

For the convenience of the user, an index to all targets is included with targets arranged alphabetically within a country.
