The facility consists of a tall suspect TV/microwave tower atop a hill on the south edge of the urban complex.

Each of the five facilities has a different photographic signature. They may represent portions of several microwave links in the area. The limited interpretability of available photography precludes the observation of microwave antenna elements or determination of mensural data for the towers.

3. This project is considered complete. Any further inquiries should be directed to [redacted] NPIC/IEG/SD/EB, IDS Code 143,
