NPIC Project 250744

25X1

1. In response to the referenced requirement, a search was made of the best available [Redacted] photography for details not previously reported on communications equipment within a radius of 3 to 5 nautical miles of seven facilities that were listed.

2. This search was accomplished on high- and low-resolution photography of fair to good interpretability and revealed no information that had not been published in previous reports.

3. The lack of additional information, the large number of other installations in the areas searched, and the lack of definite indications of the relationship of the seven facilities to other facilities make preparation of site layout sketches impracticable.

4. This project is considered to be complete. Questions may be directed [Redacted] of the Western USSR/Europe Branch, WGD/IEG on
