KHABAROVSK AGRICULTURAL MACHINERY AND MUNITIONS PLANT
"MOLOTOV" 106

25X1D

The Khabarovsk Agricultural Machinery and Munitions Plant "Molotov" 106 appears on [REDACTED] photography. It is located on the eastern bank of the Amur River, halfway between the railroad passenger station in Khabarovsk and the railway bridge across the river four miles to the northwest. This plant is one of the most important producers of machinery and a leading ordnance repair facility in the Soviet Far East. It is also a possible producer of mortars and ammunition.

The plant consists of 18 single-story buildings in an irregularly-shaped area of approximately 1,268,000 square feet, which is enclosed by a board fence. The plant is rail served, and there is evidence of recent heavy vehicular traffic within the plant area. There is no evidence of recent expansion or new construction.

Major components of the plant are identified on the accompanying plan view and photograph and described in the following key to annotations.
