WAC NO : 245 & 238

NO : PIC/JB-73/60

PHOTO DATA:

REMARKS:

This brief, resulting from a preliminary photographic analysis, identifies two similar tracking facilities, one at approximately 47°48'N/67°29'E, about 3 nautical miles south of Dzhezkazgan, and the other at approximately 49°24'N/75°29'E, about 2 nm southeast of Karkaralinsk.. USSR. In physical layout and equipment, these facilities are similar to a tracking facility at Chelkar, USSR (47°45'N/59°35'E). Also, some similar equipment has been identified near Launch Complex "D" at Vladimirovka. Each facility has two operations areas. One operations area consists primarily of a TOKEN and a BAR LOCK radar; the other contains two separated instrumentation buildings, with three vehicles positioned in the same pattern associated with each building. There are indications of various other tracking, instrumentation, and communications equipment at each facility. In addition, each facility has a secured support area with about 20 buildings.

NOTE: Because of the poor quality of base maps of this area and the scattered cloud cover on the photography, it is emphasized that the geographic positioning of these facilities is only approximate at this time.
