Large revetted areas located adjacent to Brest SA-2 SAM Site A-11 were observed on [REDACTED] KEYHOLE photography. One revetted area, 115 by 50 feet, is located 450 feet SE of the center of the site. A second revetted area, 120 by 70 feet, is located 480 feet west of the center of the site. Both revetments appear to be rectangular with the longer sides parallel to the site circular road. They appear to be drive-through, but as yet there are no service roads to them and earth scarring indicates that the areas are still under construction.

There is a third, possible revetted area, approximately 85 by 75 feet, located 600 feet ENE of the center of the SAM site. This possible revetment also appears to be drive-through and rectangular, but the shorter sides are parallel to the site circular road. A loop road, which appears to be connected to the circular road, services this area.

25X1D

25X1D

There was construction at all three locations on photography from Mission [REDACTED]

25X1D

Brest SA-2 SAM Site A-11 is located 7.5 nm ESE of Brest. The site has a modified "link" configuration and was complete when identified on KEYHOLE photography from Mission [REDACTED]

25X1D

[REDACTED] It appears to be fully opera-

tional, having launchers, guidance and support equipment, and three missile-hold revetments.

The site support area, located approximately 1,200 feet SW of the SA-2 site, contains seven buildings: three 75 by 35 feet; one 75 by 25 feet; one [REDACTED] by 53 feet; one 60 by 35 feet; and one approximately [REDACTED] feet square. In addition, there is a possible building or wall 110 feet long and approximately 15 feet wide.
