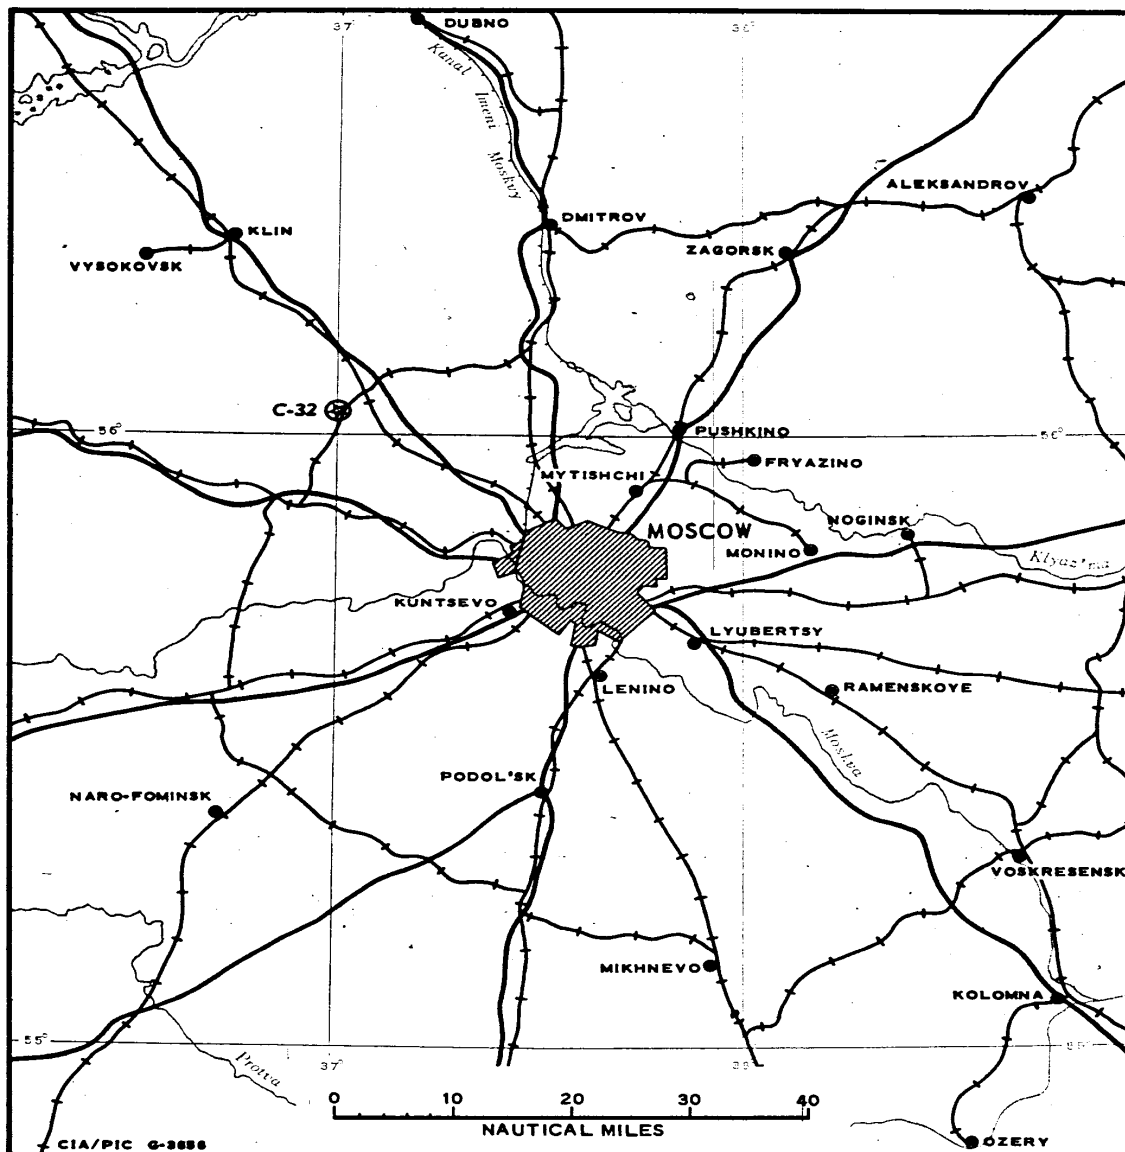

FIGURE 2. LOCATION OF MOSCOW HERRINGBONE SAM SITE C-32

S-E-C-R-E-T
NOFORN/LIMITED DISTRIBUTION

PIC/JB-1012/60

REFERENCE POINT:

The Kremlin, 55-45N 37-37E.

LOCATION:

27 nm northwest of reference point.

FUNCTION:

One of a group of sites deployed for the defense of Moscow.

SITE STATUS:

Probably complete and operational.

REMARKS:

This is the first known photographic coverage of Herringbone SAM Site C-32.

The site is located in a wooded area on the inner herringbone defense ring. It is regularly shaped except for a section of service road that curves in order to avoid a small lake.

Although not all the service roads are discernible on the small-format photography, Site C-32 probably has 60 launch points. A YO-YO radar site and housing for the SAM site have been identified.
