VODOCHODY JET AIRCRAFT PLANT, CZECHOSLOVAKIA

This report is in answer to a request from I/AR to attempt to determine from ground photography the layout of the major buildings of the new Vodochody Jet Aircraft Plant, Czechoslovakia.

There is no available vertical or oblique aerial photography covering this plant.

All available ground photography was obtained. Based on a careful study of these photographs the accompanying sketch was prepared. This sketch is necessarily incomplete because complete photographic coverage of the plant area is not available. The dimensions on the sketch were based on the wing span of a MIG-15 and the height of men imaged on the photography. The measurements are probably accurate to plus or minus ten percent. More precise measurements could not be obtained because of the lack of photographic data such as type of camera, focal length, precise location of camera at time of exposure, etc.
