Two (2) drive-through storage buildings 230 by 40 feet, 15 feet high. Ground scarring indicates the possibility of a third building being constructed which would compare with the smaller third building at Arkhangelsk/Kholm, Bykhov, and Mal'Yavr (150 by 50 feet).

h. Khorol East (44-27N 132-08E)

Ten (10) drive-through storage buildings, 200 by 50 feet,  
15 feet high

One (1) drive-through storage/checkout building, 200 by 75  
feet, 25-30 feet high

i. Mal'Yavr (68-52N 33-42E)

Two (2) drive-through probable storage buildings, 225 by 50  
feet, 15 feet high

One (1) drive-through or drive-in probable storage/checkout  
building, 150 by 50 feet, 15 feet high

This ASM storage area is being listed as probable, mainly  
due to its location at the airfield. The buildings are in-line  
(long axis) along the taxiway, approximately mid-way down the  
runway, and appear lightly secured. No other ASM storage facility  
location compares with the Mal'Yavr facility. All of the other  
ASM facilities observed in this study are either heavily secured  
or located at the end of the runway or away from the airfield a  
distance of one or two nautical miles. However, security pre-  
cautions need not be as stringent at Mal'Yavr as in other more  
populated areas; hence, convenience probably dictated its location.

j. Okt'yabryskoye (45-19N 34-06E)

15 feet high

One (1) drive-through storage/checkout building, 125 by  
55 feet, 15 feet high

feet, 15 feet high
