MEMORANDUM FOR: Chief, Resources Division, ORR

ATTENTION []

THROUGH : Chief, Requirements Branch, Reconnaissance Group, CGS

FROM : Chief, CIA/PID (NPIC)

SUBJECT : Search for a Petroleum Refinery at Kremenchug, USSR

REFERENCES : (1) ORR Requirement No. C-RR4-81,233
(2) CIA/PID Project No. C 592/64, S 741/64

1. This memorandum is in response to the referenced requirement which asks for a description of the Petroleum Refinery at Kremenchug, USSR. This description is to include level of construction, coordinates, areal extent, and enumerate the individual refining units in existence or under construction, and an annotated photographic enlargement of the refinery.

2. Good quality [] photography [] provided stereo coverage of the Kremenchug Area. A search of this photography for a petroleum refinery resulted in the identification of a chemical-type industry located 6 nm north of Kremenchug at 4908N - 3328E. This industrial development is a chemical industry and it could possibly be a petroleum refinery under construction (see attached photo-enlargements). Typical ground scars, tankage and structures, normally found at soviet petroleum refineries are not present here. However, this industrial complex is still in the early stages of construction although construction of a portion had begun before []. This industrial area includes 22 vertical tanks and eight bases for semi-buried tanks. The complex has an areal extent approximately $3\frac{1}{2}$ miles at the southern edge, two miles at its northern edge and a length of three miles.

3. This study was conducted for []
[] The enclosed photo enlargements were selected from these missions.
