The following alphabetical designators are used to delineate functional areas within military installations.

- A. Billeting area
- B. Vehicle storage/maintenance
- C. General storage area
- D. Ammunition storage
- E. Miscellaneous (hospitals, prisons, POL, personnel training facilities and unidentified facilities)
- F. Small arms range
- G. Driver training area
- H. Support
- J. Tank/assault gun range
- K. Flat trajectory range
- L. Sub caliber range
- M. APC range
- N. Combined arms range
- P. Artillery training area
- Q. Infantry training area
- R. Special or unidentified area

- NOTE:
1. The absence of one or more alphabetical designators indicates that those functional areas were not observed at that particular installation.
 2. Lower case letters (i.e., B_a) are used to delineate more than one area of a particular functional category.
 3. Numbers are used with the alphabetical designators in some instances to identify vehicles or groups of vehicles within a functional area (i.e., B_a 1).

TRAINING AREAS (See Figures 1, 3 & 4)

A large training area is located approximately 6-7 kilometers south of the Tallinn Army Barracks Tondi. Facilities at this area include a large flat-trajectory firing range, a combination tracked and wheeled vehicle driver training course, numerous infantry training facilities, and at least two sub-caliber firing ranges. Extensive mining activity in this area indicates that the area now occupied with military training facilities may be abandoned in favor of the mining activity. New mining activity has continued to encroach upon the military training area since [REDACTED] 25X1D

Activity on the firing ranges and the driver training circuits is difficult to assess due to the light tone of the soil within the area and its apparent resistance to weathering.

An unidentified installation is located immediately west of the training areas and south of the Tallinn Ammo Depot Nomme South. Very little activity is evident at this installation. It may function as a support facility for military units that are utilizing the training facilities on a seasonal basis.

PI COMMENTS

Extensive new construction is taking place around this military installation. New apartment type housing, industrial activity, and highway construction is evident in areas adjacent to the present installation. Parts of the training areas have been utilized for these new nonmilitary activities. Activity appears to be at a low level throughout the installation.

ADDITIONAL INFORMATION

25X1A

25X1A

The Tallinn Military Barracks [REDACTED] and the Tallinn Army Barracks Kopli [REDACTED] do not appear to be related to ground force activity. [REDACTED] indicates that these installations are probably connected with naval activity at the Tallinn port facilities. 25X1D
