This report contains an analysis of two facilities in the Magadan, JUSS area reported as unidentified installations (Document Reference Nucher 1). Both areas were studied for possible association with the Soviet antiballistic missile program. They were reported in the referenced cable as an unidentified search area at 60-27N 151-27E and an unidentified installation with an "E" shaped building at 59-42E 151-04E. 25X1D	This report contains an analysis of two facilities in the Magadan, JUSS area reported as unidentified installations (Document Reference Nucher 1). Both areas were studied for possible association with the Soviet antiballistic missile program. They were reported in the referenced cable as an unidentified search area at 60-27N 151-27E and an unidentified installation with an "E" shaped building at 59-42N 151-04E. 25X1D 	This report contains an analysis of two facilities in the Magadan, JUSS area reported as unidentified installations (Document Reference Nucher 1). Both areas were studied for possible association with the Soviet antiballistic missile program. They were reported in the referenced cable as an unidentified search area at 60-27N 151-27E and an unidentified installation with an "E" shaped building at 59-42E 151-04E. 25X1D	This report contains an analysis of two facilities in the Magadan, JUSS area reported as unidentified installations (Document Reference Nucher 1). Both areas were studied for possible association with the Soviet antiballistic missile program. They were reported in the referenced cable as an unidentified search area at 60-27N 151-27E and an unidentified installation with an "E" shaped building at 59-42R 151-04E. 25X1D	This report contains an analysis of two facilities in the Magadan, JUSS area reported as unidentified installations (Document Reference Nucher 1). Both areas were studied for possible association with the Soviet antiballistic missile program. They were reported in the referenced cable as an unidentified search area at 60-27N 151-27E and an unidentified installation with an "E" shaped building at 59-42R 151-04E. 25X1D			
USSR area reported as unidentified installations (Document Reference Number 1). Both areas were studied for possible association with the Soviet antiballistic missile program. They were reported in the referenced cable as an unidentified search area it 60-27N 151-27E and an unidentified installation with an "E" shaped building at 59-42N 151-04E. 25X1D <u>Analysis of</u> different missions, define from 25X1D reported installations: Area 1 is a probable explosives storage center containing five small revetted buildings. It is located just north of the form of Yablonovy which is on the main highway leading northward from Magadan into the hinterland (Figure 2). Area 2, located 12 nautical miles northeast of Magadan, contains an "E" shaped buildings comevhant similar in general configuration to these recently reported at the Sary Shagan Antimissile Test Center (Document Reference Number 2). The "E" buildings or "Radar B's" at Sary Shagan are suspected to be associated with ABM developmental activity. First noted under construction at Sary Shagan in the and the area appears unchanged since that time. Cenerally, the area in question at Area 2 near Magadan has been present Sime at least and the area appears unchanged since that time. Cenerally, the area in guestion at Area 2 near Magadan has been present specifically, the "E" building is probably a livestock barn (Figure 3).	USSR area reported as unidentified installations (Document Reference Number 1). Both areas were studied for possible association with the Soviet antiballistic missile program. They were reported in the referenced cable as a unidentified search area at 60-27N 151-27E and an unidentified installation with an "E" shaped building at 59-42N 151-04E. 25X1D Analysis of different missions, deting from 25X1D reported installations: Area 1 is a probable explosives storage center containing five small revetted buildings. It is located just north of the from Magadan into the hinterland (Figure 2). Area 2, located 12 nautical miles northeast of Magadan, contains an "E" shaped building somewhat similar in general configuration to these recently reported at the Sary Shagan Antimissile Test Center (Document Reference Number 2). The "E" buildings or "Radar B's" at Sary Shagan are suspected to be associated with ARM develomental activity. First noted under construction at Sary Shagan in the the area appears unchanged since that time. Cenerally, the area in guestion at Area 2 near Magadan has been present Since at least Cenerally, the area fing usettion at Area 2 near Magadan has been present specifically, the "E" building is probably a livestock barn (Figure 3).	USSR area reported as unidentified installations (Document Reference Number 1). Both areas were studied for possible association with the Soviet antiballistic missile program. They were reported in the referenced cable as an unidentified search area it 60-27N 151-27E and an unidentified installation with an "E" shaped building at 59-42N 151-04E. 25X1D <u>Analysis of</u> different missions, define from 25X1D reported installations: Area 1 is a probable explosives storage center containing five small revetted buildings. It is located just north of the form of Yablonovy which is on the main highway leading northward from Magadan into the hinterland (Figure 2). Area 2, located 12 nautical miles northeast of Magadan, contains an "E" shaped buildings comevhant similar in general configuration to these recently reported at the Sary Shagan Antimissile Test Center (Document Reference Number 2). The "E" buildings or "Radar B's" at Sary Shagan are suspected to be associated with ABM developmental activity. First noted under construction at Sary Shagan in the and the area appears unchanged since that time. Cenerally, the area in question at Area 2 near Magadan has been present Sime at least and the area appears unchanged since that time. Cenerally, the area in guestion at Area 2 near Magadan has been present specifically, the "E" building is probably a livestock barn (Figure 3).	USSR area reported as unidentified installations (Document Reference Number 1). Both areas were studied for possible association with the Soviet antiballistic missile program. They were reported in the referenced cable as an unidentified search area is 60-27N 151-27E and an unidentified installation with an "E" shaped building at 59-42N 151-04E. 25X1D <u>Analysis of</u> different missions, dating from 25X1D reported installations: Area 1 is a probable explosives storage center containing five small revetted buildings. It is located just north of the town of Yablonovy which is on the main highway leading northward from Magadan into the hinterland (Figure 2). Area 2, located 12 nautical miles northeast of Magadan, contains an "E" shaped buildings comevhant similar in general configuration to these recently reported at the Sary Shagan Antimissile Test Center (Document Reference Number 2). The "E" buildings or "Radar E's" at Sary Shagan are suspected to be associated with ABM develormental activity. First noted under construction at Sary Shagan in the the area appears unchanged since that time. Cenerally, the area in question at Area 2 near Magadan has been present Similar to other small, remote centers videly scattered in the region. Specifically, the "E" building is probably a livestock barn (Figure 3).	USSR area reported as unidentified installations (Document Reference Number 1). Specifically, the "E" building is probably a livestock barn (Figure 3). 25X1		results in the following conclusions regarding the	(1D
Small revetted buildings. It is located just north of, the town of Yablonovyy which is on the main highway leading northward from Magadan into the hinterland (Figure 2). Area 2, located 12 nautical miles northeast of Magadan, contains an "E" shaped building somewhat similar in general configuration to these recently reported at the Sary Shagan Antimissile Test Center (Document Reference Number 2). The "E" buildings or "Radar B's" at Sary Shagan are suspected to be associated with ABM developmental activity. First noted under construction at Sary Shagan in the elsewhere in the USSR. The "E" building in question at Area 2 near Magadan has been present since at least and the area appears unchanged since that time. Generally, the area in question at Area 2 near Magadan has been present similar to other small, remote centers widely scattered in the region. Specifically, the "E" building is probably a livestock barn (Figure 3).	Small revetted buildings. It is located just north of, the town of Yablonovyy which is on the main highway leading northward from Magadam into the hinterland (Figure 2). Area 2, located 12 nautical miles northeast of Magadan, contains an "E" shaped building somewhat similar in general configuration to these recently reported at the Sary Shagan Antimissile Test Center (Document Reference Number 2). The "E" buildings or "Radar B's" at Sary Shagan are suspected to be associated with ABM developmental activity. First noted under construction at Sary Shagan in the elsewhere in the USSR. The "E" building in question at Area 2 near Magadan has been present (Cenerally, the area in question at Area 2 near Magadan has been present similar to other small, remote centers widely scattered in the region. Specifically, the "E" building is probably a livestock barn (Figure 3).	Small revetted buildings. It is located just north of, the town of Yablonovyy which is on the main highway leading northward from Magadan into the hinterland (Figure 2). The "E" building in question at Area 2 near Magadan has been present Since at least and the area appears unchanged since that time. Generally, the area in question at Area 2 near Magadan has been present similar to other small, remote centers widely scattered in the region. Specifically, the "E" building is probably a livestock barn (Figure 3).			
"E" shaped building somewhat similar in general configuration to these recently reported at the Sary Shagan Antimissile Test Center (Document Reference Number 2). The "E" buildings or "Radar B's" at Sary Shagan are suspected to be associated with AEM developmental activity. First noted under construction at Sary Shagan in the they have not, to date, been identified elsewhere in the USSR. The "E" building in question at Area 2 near Magadan has been present is incleaned in question appears to be an agricultural center-similar to other small, remote centers widely scattered in the region. Specifically, the "E" building is probably a livestock barn (Figure 3).	"E" shaped building somewhat similar in general configuration to these recently reported at the Sary Shagan Antimissile Test Center (Document Reference Number 2). The "E" buildings or "Radar B's" at Sary Shagan are suspected to be associated with AEM developmental activity. First noted under construction at Sary Shagan in the they have not, to date, been identified elsewhere in the USSR. The "E" building in question at Area 2 near Magadan has been present is ince at least and the area appears unchanged since that time. Generally, the area in question appears to be an agricultural center-similar to other small, remote centers widely scattered in the region. Specifically, the "E" building is probably a livestock barn (Figure 3).	"E" shaped building somewhat similar in general configuration to these recently reported at the Sary Shagan Antimissile Test Center (Document Reference Number 2). The "E" buildings or "Radar B's" at Sary Shagan are suspected to be associated with AEM developmental activity.
