IEG PI NOTICE

No. 11-74

COMMENT: This building complex is the key to the identification of the function of this installation. When completed the building complex will consist of two large buildings connected by a covered passageway. Ten, short, curved passageways (five on each side of the main passageway) will connect ten 60 x 40 foot rectangular structures to the main passageway. The entire structure will be roofed.

Any similar buildings or construction activity should be brought to the attention of the IEG UI Coordinator.
