SUBJECT
AREA: MOBILE ICBM SIGNATURES

DISTRIBUTION:

ALL PI's

IEG PI NOTICE

No. 5 - 75

TITLE/SIGNIFICANCE: The superstructure on the probable SS-X-16 TEL is very similar to the superstructure on the probable SS-X-16 railcar at Plesetsk MTC. (See P.I. Notice 19-74)

COMMENT: A 70-foot-long superstructure observed on the probable SS-X-16 TEL at Volgograd and on the probable SS-X-16 railcar at Plesetsk appear to be the same type apparatus. This superstructure casts a distinct shadow which provides a good signature for SS-X-16 mobile ICBM activity. Note the solid portion of the shadow.
