IEG PI NOTICE

No. 10-76

TITLE/SIGNIFICANCE:

NAN B - New Chinese Aircraft

COMMENT: A small, indigenously designed, single engine, swept-wing jet aircraft was observed at the Nan-chang Airframe Plant 320. The ultimate role of this aircraft is unknown but if produced it could possibly be used as a short range or point interceptor. The NAN B if it follows the normal trend for new or modified aircraft in China, will probably be seen next undergoing flight evaluation at the Hsian Airframe Plant.
