Policy
Office Memorandum • UNITED STATES GOVERNMENT

TO : Chief, PCD/MO
FROM : Chief, Medical Staff
SUBJECT: Medical Selection

DATE: 25 July 1951

ILLEGIB

1. As previously suggested, selection of personnel for Disaster Planning purposes should be subject to medical screening.

2. Medical screening should not consist of the usual application of medical standards. To obviate unnecessary examinations and to maintain security, the following procedures will apply:

a. The identity of each selectee will be furnished the Medical Office.

b. The medical file of the selectee will be examined and the medical evidence existing in the file will be used as a basis for adjudication of selection.

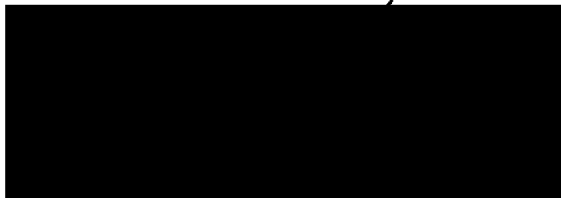

c. Selectees will be medically disqualified only if their assignment would result in death, serious illness or require complex treatment.

d. Selectees without medical evidence in file will be maintained in a separate list. The problem of obtaining medical evidence in these cases will be considered only after the screening is complete.

e. No case will be disqualified without concurrence of the Chief, Medical Staff.

3. The problem of screening is the function of Technical Services, not PCD.
