9 August 1976

MEMORANDUM FOR THE RECORD

STATINTL

SUBJECT: Meeting with [redacted] 9 August 1976

STATINTL

I spoke to [redacted] this morning concerning the following:

STATINTL

1. I clarified that the previous discussion I had with George on retirement involved his being "surplus" and not some other scheme. George mentioned that he had talked to Mr. [redacted] and understands the need for his not being declared until approximately 60 days before the day of retirement. He also mentioned that if this does not materialize, he would insist on being reassigned from RAB. It is quite clear that among George, Mr. [redacted] and myself, there are no misunderstandings relating to his retirement. Just for the record, I should emphasize that I made very clear to George that he will sacrifice almost 6% in annuity because of his age (under 55). There is no question in George's mind that this will be the case.

STATINTL

2. I advised George that I talked to Mr. Gambino about his association with a "bomb squad" as qualifying domestic service towards CIARDS. I told him that Mr. Gambino says that this service has not been included towards CIARDS.

STATINTL

3. In response to George's questions concerning the recording of his training, I told him that, in fact, almost all of his training is properly recorded. In that some training is not included, based on a comparison of George's official file and a list of training which he prepared, he should prepare a list of those discrepancies and send them to [redacted] to have them included in the record.
