VIII. Areas under Chinese Administration (Map)	125
IX. Manchuria and Jehol Administrative Divisions (Map)	126
X. Bibliography.	127

I. INTRODUCTION

This report includes a brief description of the various types of administrative divisions of the Republic of China as they existed under the actual or nominal jurisdiction of the National Government about 1947, and tables giving the names of the governmental units, with estimates of area and population for each. From the standpoint of the National Government the information is substantially correct as of the present time. In areas controlled by Chinese Communist forces various regional regimes have been set up, but the extent to which the Communists intend to change the basic geographic framework of administration is not yet clear. Communist administrative organization is therefore not discussed in this report.

The data in the tables were taken from three Chinese language publications of the Chinese Ministry of the Interior.¹ The information in the publications was compiled mainly from material supplied by the various provinces. In many instances the statistics are estimates rather than the results of accurate surveys. No data were given for some areas and mistakes in the published totals were discovered when items were independently added. Although the data are inadequate, they are the best available for China as a whole.

This report is accompanied by map CIA 11022 which shows the entire area covered by the report, and by map CIA 10695 which shows the 1948 administrative divisions of Manchuria and Jehol. A series of individual province maps showing the locations and boundaries of the administrative units is being prepared for use in connection with the report.

The sheng (provinces), as well as their principal subdivisions, the hsien (counties or districts), have their origins far back in

1. Administrative Areas in China, Tables, 11th ed., Commercial Press, Shanghai, 1947.
Leagues and Banners in the Various Provinces, Population Statistics, Nanking, 1948.
Tables of Leagues and Banners and Their Locations, Nanking, 1948.

Chinese history. Fifteen provinces took approximately their present form during the Ming Dynasty (AD 1368-1644). At the time of the downfall of the Manchu Empire in 1911, China consisted of 18 provinces south of the great wall (China Proper), together with the outer areas of Manchuria, Outer Mongolia, Inner Mongolia, Sinkiang and Tibet. There were three provinces in Manchuria, and Sinkiang had the status of a province. Since the establishment of the Republic the number of provinces has been increased. Six new provinces were organized in the 1920's out of Inner Mongolia, eastern Tibet, and adjoining portions of older provinces. Upon the expulsion of the Japanese in 1945, Manchuria was reorganized into nine provinces, three of which preserved the old provincial names. Taiwan (Formosa) became a province in 1947.¹ Present-day China, therefore, is divided into 35 provinces, including those of China Proper, those created from former outer areas, and Taiwan. Tibet ranks as a ti-fan (special area) according to the National Government set-up. Mongolia (Outer Mongolia, or the "Mongolian Peoples' Republic"), is no longer under the jurisdiction of the Chinese Republic and is not discussed in this report.

-
1. The Cairo Declaration, issued in December, 1943 by the United States, the United Kingdom, and China, stated that "all the territories Japan has stolen from the Chinese, such as Manchuria, Formosa, and the Pescadores, shall be restored to the Republic of China." The Chinese Government took possession of Taiwan (Formosa) at the end of World War II. A formal settlement of the question of former Japanese territories awaits negotiation of a Peace Treaty with Japan.

II. ADMINISTRATIVE DIVISIONS

There are two types of first order civil divisions in China. These are the Yüan-hsia shih (municipality under the Executive Yüan, or special municipality) and the sheng (province). In addition, there is the ti-fan (special area) of Tibet, which may be considered a first order division but which is different from either classification.

- (1) Yüan-hsia shih (municipality under the Executive Yüan, or special municipality)

Each of the more important cities of China is included in an area administered separately from the surrounding province and having the same status as the province. There are twelve such areas, known as Yüan-hsia shih, or municipalities under the Executive Yüan. This means that they are under the jurisdiction of the Central Government, at least in theory. For brevity they will be referred to in this report as special municipalities.¹ They comprise (a) the national capital, (b) cities with over 1,000,000 population, and (c) cities of special political, economic, and cultural importance. The number of special municipalities has steadily increased in recent years. Although special municipalities are presumed to be urban in character, some include agricultural land within their boundaries. For administrative purposes, special municipalities are divided into a number of ch'ü (districts). A ch'ü contains 10 to 20 pao (boroughs); a pao contains 10 to 30 chia (wards); and a chia contains 10 to 30 households.²

1. The special municipalities should not be confused with the municipalities under the jurisdiction of the provinces, which are referred to in this report as ordinary municipalities. Both types of municipalities are commonly called shih in Chinese. Thus: Ch'ung-ch'ing Shih, a special municipality; and Hsu-chou Shih, an ordinary municipality.
2. Administrative units lower than the special municipalities, such as ch'ü, pao, and chia, are not listed in the tables.

(2) Sheng (province)

Provinces are, generally speaking, the largest and the most important of the administrative divisions in China. In theory the provincial governments are subordinate to the Central Government, but in practice they are often times autonomous. All provinces contain 2 types of second order administrative units: the hsien (county or district) and the shih (city). Many provinces also contain a type of unit known as the she-chih-chü (preparatory county, or preparatory hsien). In Szechwan province there is one kuan-li-chü (special district or experimental area). Some provinces which contain a large number of hsien have so-called administrative supervisory areas, each with several hsien under their jurisdiction. As yet these areas do not form a grade in the hierarchy of local government.

(3) Hsien (county or district)¹

The hsien has been the basic unit of local government in China since the Ch'in Dynasty about 211 B.C., when China was unified for the first time. In 1912, one year after the establishment of the republic, there were 1277 hsien in China. Since then, more than 700 new hsien have been added; the total number for 1947 was 2017. During the past decade, especially while the national capital was located at Ch'ung-ch'ing (Chungking) many new hsien were created in the three southwestern provinces of Szechwan, Kweichow, and Yünnan by regrouping portions of older hsien. In the northeast, north central, and western provinces many new hsien have been created where none existed before.

1. The term hsien is translated as either county or district. The Chinese word will be used in this report.

The number of hsien per province varies greatly. Szechwan, for example, has 139 hsien whereas Hsingan has only 7. In size and population the hsien range from small rural communities of a few hundred people to populous centers like Nan-hai Hsien in Kwangtung, Shao-yang Hsien in Hunan and Ho-fei Hsien in Anhwei, which have tens of thousands of inhabitants. Most hsien are divided into hsiang (village or commune) in rural areas and chen (town or commune) in urban areas. Under special conditions, however, the hsien may be divided first into ch'ü (districts) which are in turn divided into hsiang and chen. Hsiang are further divided into pao (boroughs) and chen are divided into chia (wards).

(4) Shih (municipalities under the jurisdiction of the province, or ordinary municipalities)

Cities which are not important enough to be special municipalities have municipal governments which are subordinate to the province in which they are located. There were 57 of these ordinary municipalities in 1947. The types of cities falling within this category include (1) seats of provincial governments, (2) cities with a population of over 200,000 that are not special municipalities, and (3) cities possessing special political, economic, and cultural importance having a population of over 100,000. The ordinary municipalities, like the special municipalities, are divided administratively into ch'ü (districts), which are in turn subdivided into pao (boroughs) and chia (wards).

(5) She-chih-chü (preparatory county, or preparatory hsien)¹

Areas which have not met the requirements necessary for a hsien but which may eventually do so are called she-chih-chü (preparatory hsien). These administrative units consist of areas that are too small in size,

1. Some sources refer to these units as government bureaus.

too sparse in population, or too backward economically to be transformed into hsien. The number of preparatory hsien changes from time to time. There were 38 of them in 1947. Preparatory hsien have a simpler organization than hsien. In most cases only two or three officials are appointed to take charge of local affairs.

(6) Pu, Meng (league)¹

Some of the area in 11 of China's northern and northeastern provinces is inhabited by Mongol and Manchu tribes. These tribes have established political subdivisions that exist along side the sheng and hsien pattern within the Chinese administrative structure. The tribal subdivisions are the pu (league), meng (league) and the ch'i (banner). The leagues are the largest divisions. Although they are usually found within a single province, several of them extend across province lines. Leagues are divided into ch'i (banners).

(a) Pu (league)

The pu (Chinese), or ainak (Mongolian), or league (English), was originally a Mongolian tribal unit made up of an ethnic group headed by a ruling prince. Under Chinese administration the organization of the leagues has been modified by the appointment of Chinese administrative officers to supervise the affairs of the league. Several of the leagues no longer have a hereditary prince for a leader. There are 5 pu (leagues) in the provinces of Hsingan, Chahar, Suiyüan, and Sinkiang, each composed of one or more ethnically related ch'i (Chinese), or hoshio (Mongolian), or banners (English).

(b) Meng (league)

The meng (Chinese), or chigalgan (Manchu), or league (English), was introduced by the Manchu Emperors in order to weaken the Mongol

1. The Chinese terms pu and meng refer to 2 types of civil divisions among the Mongol and Manchu tribes. Both are referred to in English sources as "leagues."

tribal unity. Several tribes were combined into larger administrative units known as leagues. Each league was presided over by an appointed official not by a hereditary ruler.

Under Chinese administration the leagues are supervised by officials some of whom are elected from within the league while others in theory, at least, are appointed by the Chinese Government. There are 8 leagues of this type in the provinces of Chahar, Jehol, Kirin, Liaopeh, Nunkiang, Suiyüan, and Tsinghai. These leagues are also divided into ch'i (banners).

(7) Ch'i (banner)

(a) Ch'i under the pu or meng

The ch'i may be either Mongol or Manchu in origin or a combination of the two. The Mongolian ch'i was composed of the personal followers of a chief. The Manchu ch'i was organized around a locality under an appointed chief and all the bannermen were enrolled in the Manchu Army.

Under Chinese administration most of the banners are subgroups under either pu or meng. They rarely include a complete tribe and their administration is supervised by Chinese officials. A banner may be located within the same area as a hsien or in an area where no hsien has been established.

Examples:

<u>Sheng</u>	<u>Hsien</u>	<u>Ch'i</u>
Hsingan	So-lun	Hsi-cha-ka-erh
Hsingan	----	A-ping

(b) Ch'i independent of pu or meng

In Heilungkiang, Ningsia, and Suiyüan where there are neither pu nor meng, the ch'i are in theory under the supervision of the Central Government. Some sources refer to them as independent banners.

(8) Tibet

Tibet, with its capital at La-sa (Lhasa), is nominally under the jurisdiction of China. The Chinese do not claim provincial status for Tibet, but designate it as a ti-fan (special area or territory). The publication Administrative Areas in China, Tables does not give any data for subdivisions of Tibet and for this reason Tibet is not listed in the accompanying tables. In 1947, the Census Bureau of the Ministry of Interior estimated the population of Tibet at about 1,000,000; the Department of Administration Area of the Ministry reported an estimated area of 1,215,781 square kilometers. Tibet is divided into three "provinces"¹ as follows:

<u>Chinese name</u>	<u>Tibetan name</u>
Ali	Ngari
Hou Tsang	Tsang
Ch'ien Tsang	Ü

-
1. See map CIA 11053, "Political Divisions and Transportation Routes of Tibet."

III. THE NAMES USED

All the names that appear in the report except those for pu, meng, and ch'i (leagues and banners) have been approved by the United States Board on Geographic Names. The English readings were romanized from Chinese characters according to the modified Wade-Giles system. The Chinese characters which appear beside the names in the lists were supplied by Mr. Samuel T. Chang of the Division of Languages in the Department of State. Whenever possible, the English conventional names of the provincial capitals and the larger cities of China, as well as the conventional names of the leagues and banners, have been added as an aid to recognition.

Special problems exist in regard to the names of hsien and hsien seats.

(1) Hsien. In all of the Chinese provinces except Taiwan (Formosa) a hsien and its administrative center, the hsien seat, carry the same name. The names of these two administrative divisions can be distinguished in the following way:

(a) When the term hsien is used to designate the hsien (county) it is (1) always capitalized, (2) never divided from the proper name by a hyphen, (3) always a part of the proper name regardless of whether the proper name contains one or two words (Chinese characters).

Examples:

I Hsien - a hsien (county)
Ch'ang-an Hsien - a hsien (county)

(b) When the term hsien is used to designate the hsien seat it is (1) not capitalized, (2) separated from the proper name by a hyphen, and (3) omitted if the proper name contains 2 words (Chinese characters).

Examples:

I-hsien (hsien seat of I Hsien)

(2) Hsien seat changes. The Chinese have found it necessary, in some instances, to move a hsien seat from one town to another. In such cases the hsien seat name is (1) used in preference to the name of the town to which it is moved, (2) not used if the town or city is located within a municipality.

Examples:

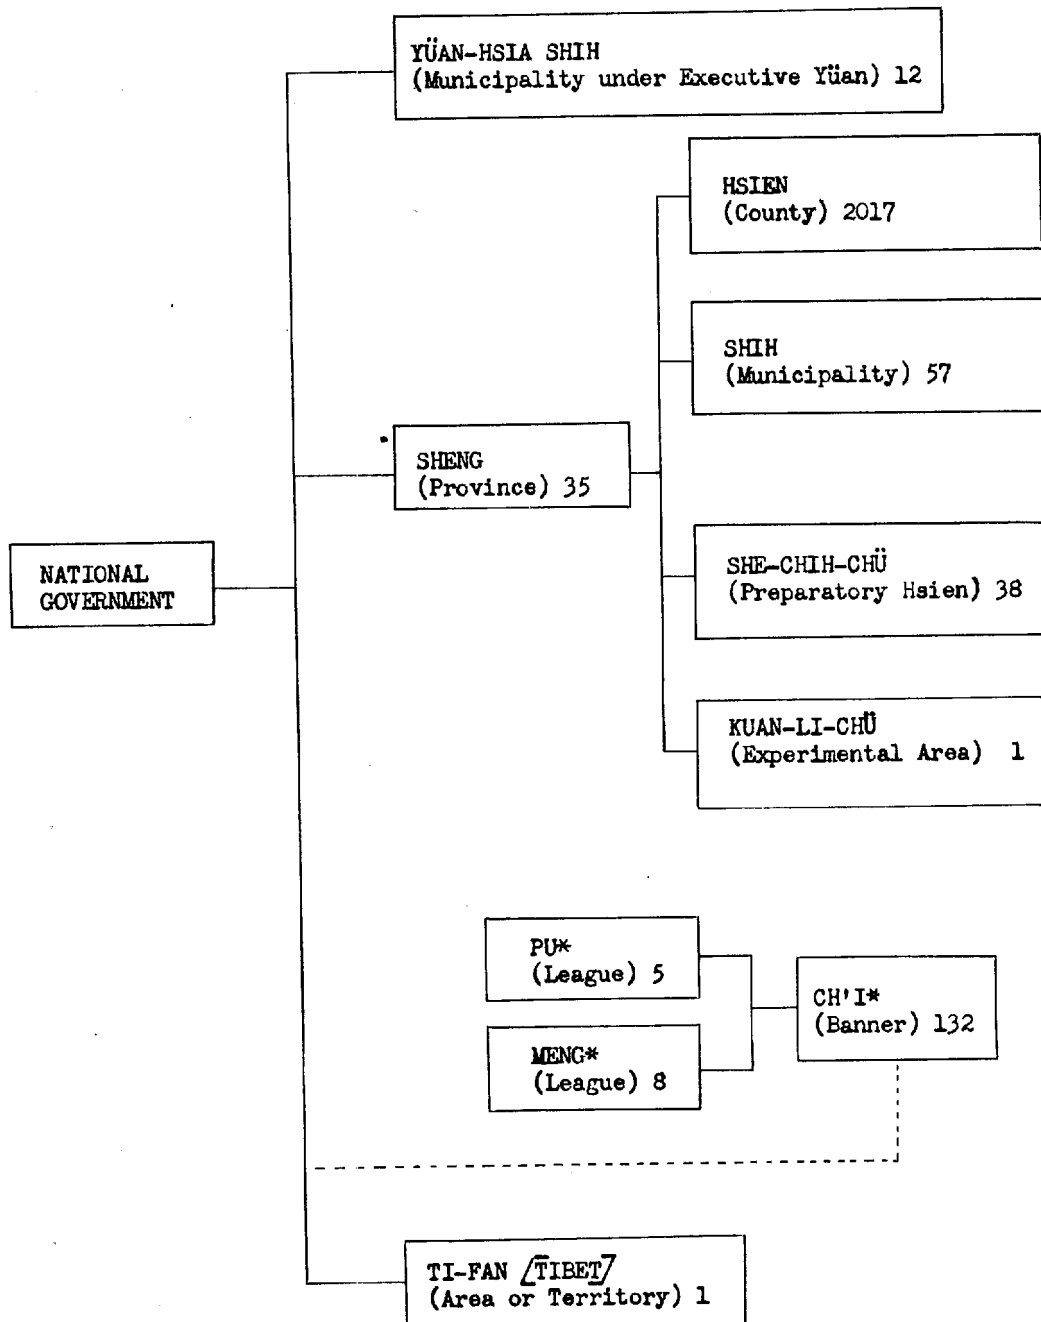

(a) Ch'ang-an, the hsien seat name, is used in preference to Wei-ch'ü, the town name.

(b) The municipality of Wu-chou Shih, contains the administrative center of Ts'ang-wu Hsien, but the name of the city, Wu-chou, is used in preference to Ts'ang-wu, the name of the hsien seat.

11

IV. CHART OF ADMINISTRATIVE DIVISIONS

INCLUDED IN LISTS

* Mongolian administrative units

V. NUMBER OF ADMINISTRATIVE DIVISIONS IN EACH PROVINCE

PROVINCE	HSIEN	SHIH ##	SHE-CHIH-CHÜ	KUAN-LI-CHÜ	PU	MENG	CH'I
