FOREWORD

The National Basic Intelligence Factbook, a compilation of basic data on political entities worldwide, is coordinated and published semiannually by the Central Intelligence Agency. The data are prepared by components of the Central Intelligence Agency, the Defense Intelligence Agency, and the Department of State. Comments and suggestions regarding the contents should be addressed to the Office of Geographic and Cartographic Research (Att: Factbook) Central Intelligence Agency, Washington, D.C. 20505.

The publication is prepared for the use of U.S. Government officials. The format, coverage and contents of the publication are designed to meet the specific requirements of those users. U.S. Government officials may obtain additional copies of this document directly or through liaison channels from the Central Intelligence Agency.

Non-U.S. Government users may obtain this along with similar CIA publications on a subscription basis by addressing inquiries to:

------	------------------------------------

January 1977

Political, sociological, and economic data, including monetary conversion rates, generally reflect information through mid-October 1976, except for population estimates, which have been projected to 1 January 1977. Military manpower estimates are as of 1 July 1976 except for average number of males reaching military age, which are projected averages for the 5-year period 1976-80. Military and communications data are as of 31 October 1976 unless otherwise indicated.

Most of the land utilization estimates are rough approximations, and most of the statistical data are rounded (thousands and millions). Figures for "arable" may reflect only the area actually under crops rather than the potential cultivable. Fishing limits are included only when they differ from the territorial limits.

For some countries GDP, rather than GNP, is shown. The difference between the two is in the addition or subtraction of the value of return on foreign investment. GDP equals GNP plus income earned in the country but sent abroad, minus income earned abroad but sent into the country. GDP thus tends to exceed GNP in debtor countries, and the reverse is true in creditor countries.

Major ports are the largest maritime ports of the country, relative to other ports of the same country, on the basis of estimated port capacity, alongside berthing accommodations, and commercial or naval importance. Minor ports are the remaining ports of a country which have, relative to the major ports, significantly lower estimated port capacity, fewer alongside berthing accommodations, are of less commercial or naval importance. Major transport aircraft are those weighing over 20,000 pounds. Military budgets are in U.S. dollar equivalents. The dollar sign refers to U.S. dollars unless otherwise stated. The abbreviation FY stands for U.S. fiscal year; all years are calendar years unless otherwise indicated.

NOTE: The war between Israel and the Arab states in June 1967 ended with Israel in control of West Jordan. Although approx. 930,000 persons resided in this area prior to the start of the war, fewer than 750,000 of them remain there under the Israeli occupation, the remainder having fled to East Jordan. Over 14,000 of those who fled were repatriated in August 1967, but their return has been more than offset by other Arabs who have crossed and are continuing to cross from West to East Jordan. These and certain other effects of the 1967 Arab-Israeli war are not included in the data below.

GOVERNMENT

NOTE: Civil strife between Lebanese Christians aided by Syrian troops on the one hand, and Lebanese Muslims and their Palestinian allies on the other hand, has plagued Lebanon since early 1975, causing the near-collapse of central governmental authority. Much of the country is now under Syrian occupation; Damascus is trying to force the Palestinians to return to their refugee camps and keep out of Lebanon's internal affairs, and to preserve a unitary Lebanese state—under a modified constitution—that will be responsive to Syria's influence. At issue in the fighting

GOVERNMENT

Legal name: Republic of San Marino

Type: republic (dates from 4th century A.D.); in 1862 the Kingdom of Italy concluded a treaty guaranteeing the independence of San Marino; although legally sovereign, San Marino is vulnerable to pressure from the Italian Government

Capital: San Marino

Political subdivisions: San Marino is divided into 9 castelli: Acquaviva, Borgo Maggiore, Chiesanuova, Dogmanano, Faetano, Fiorentino, Monte Giardino, San Marino, Serravalle

Legal system: based on civil law system with Italian law influences; electoral law of 1926 serves some of the functions of a constitution; has not accepted compulsory ICJ jurisdiction

Branches: the Grand and General Council is the legislative body elected by popular vote; its 60 members serve 5-year terms; Council in turn elects two Captains-Regent who exercise executive power for term of 6 months, the Council of State whose members head government administrative departments and the Council of Twelve, the supreme judicial body; actual executive power is wielded by the Secretary of State for Foreign Affairs and the Secretary of State for Internal Affairs

SAN MARINO/SAO TOME AND PRINCIPE

1973, formed a government with the PCS from the end of World War II to 1957

Other political parties or pressure groups: political parties influenced by policies of their counterparts in Italy, the two Socialist parties are not united

Member of: ICJ, International Institute for Unification of Private Law, International Relief Union, IRC, UPU, WFTU

ECONOMY

Principal economic activities of San Marino are farming, livestock raising, light manufacturing, and tourism; the government's total budget for FY71 was about \$12 million, with the largest share of revenue derived from the sale of postage stamps throughout the world and from payments by the Italian government in exchange for Italy's monopoly in retailing tobacco, gasoline, and a few other goods; main problem is finding an additional \$3 million to finance badly needed water and electric power systems expansions

Agriculture: principal crops are wheat (average annual output about 4,400 metric tons/year) and grapes (average annual output about 700 metric tons/year); other grains, fruits, vegetables, and animal feedstuffs are also grown; livestock population numbers roughly 6,000 cows, oxen, and sheep; cheese and hides are most important livestock products

Electric power: obtained from Italy, 1975

Manufacturing: consists mainly of cotton textile production at Serravalle, brick and tile production at Dogane, cement production at Acquaviva, Dogane, and Fiorentino, and pottery production at Borgo Maggiore; some tanned hides, paper, candy, baked goods, Moscato wine, and gold and silver souvenirs are also produced

Foreign transactions: dominated by tourism; in summer months 20,000 to 30,000 foreigners visit San Marino every day; a number of hotels and restaurants have been built in recent years to accommodate them; remittances from Sanmarinese abroad also represent an important net foreign inflow; commodity trade consists primarily of exchanging building stone, lime, wood, chestnuts, wheat, wine, baked goods, hides, and ceramics for a wide variety of consumer manufactures

COMMUNICATIONS

Railroads: none

Highways: about 104 km

Civil air: no major transport aircraft

Airfields: none
