January 1979

Political, sociological, and economic data, including monetary conversion rates, generally reflect information through mid-October 1978, except for population estimates, which have been projected to 1 January 1979. Military manpower estimates are as of 1 July 1978 except for average number of males reaching military age, which are projected averages for the 5-year period 1978-82. Military and communications data are as of 31 October 1978 unless otherwise indicated.

Most of the land utilization estimates are rough approximations, and most of the statistical data are rounded (thousands and millions). Figures for "arable" may reflect only the area actually under crops rather than the potential cultivable. Fishing limits are included only when they differ from the territorial limits.

For some countries GDP, rather than GNP, is shown. The difference between the two is in the addition or subtraction of the value of return on foreign investment. GDP equals GNP plus income earned in the country but sent abroad, minus income earned abroad but sent into the country. GDP thus tends to exceed GNP in debtor countries, and the reverse is true in creditor countries.

Major ports are the largest maritime ports of the country, relative to other ports of the same country, on the basis of estimated port capacity, alongside berthing accommodations, and commercial or naval importance. Minor ports are the remaining ports of a country which have, relative to the major ports, significantly lower estimated capacity, fewer alongside berthing accommodations, are of less commercial or naval importance. Major transport aircraft are those weighing over 20,000 pounds. Military budgets are in U.S. dollar equivalents. The dollar sign refers to U.S. dollars unless otherwise stated. The abbreviation FY stands for U.S. fiscal year; all years are calendar years unless otherwise indicated.

GOVERNMENT

NOTE: Between early 1975 and late 1976, Lebanon was torn by civil war between its Christians—then aided by Syrian troops—and its Muslims and their Palestinian allies. The cease-fire established in October 1976 between the domestic political groups has generally held, despite occasional fighting, although the country is still under the occupation of Arab peacekeeping forces, almost entirely Syrian. In March 1978 southern Lebanon was invaded by Israeli troops. When the Israelis withdrew in June, they turned much of the south over to a United Nations interim force, but left Christian militias in control of zones along the border. The country's own army is gradually being re-established but is still too fragile to give the central government effective power. Israel's support of the Christians and Syria's recent support of the Palestinians have brought the two sides into rough equilibrium, but no progress has been made on national reconciliation or political reforms—the original cause of the war. The following description is based on the present constitutional and customary practices of the Lebanese system.
