

MONTHLY REPORT FOR THE CARTOGRAPHY DIVISION

Month of January 1955

A. Accomplishments

The Cartography Division reports the completion of 51 maps and charts. Production supported several components of the Agency as well as the Department of State and the Air Force. As in previous months, considerable effort was expended on the NIS program. Included were completions of 3 standard base maps, 2 of which were first revisions. Considerable support was given the DD/P, primarily via D/GG projects. In addition to the support given State for the NIS program, a significant map was prepared for a high level conference on Southeast Asian Solidarity. The considerable number of maps assigned to the Air Force consist of the final bases required for the special AFOIN project that has been underway for the past several months. During the same period, the Division accepted requests for 39 new maps and charts with ORR and OSI being the heavy requesters. The Special Support Branch reports the completion of the first series of 44 maps for the Air Force project with approximately 60 more to be completed within the first two weeks of February. The Special Support Branch also accepted requests for 31 separate items of work while completing 28. The NIS Map Coordinator had returned from reproduction 49 final NIS maps during the month, leaving 82 at the close of the reporting period. This represents a sizeable block of work through the reproduction plant. In summary, the Division can report a very active month both in regard to the number of requests and completions. The cartographic effort was in support of several components in CIA and to outside Agencies. At the close of the reporting period, 42 regular maps remained in reproduction and note should be taken of the fact that 43 maps were rerun during the period. This represents an unusually high number of reruns at the request of D/GL.

B. Coordination

As a result of several informal meetings, further efforts were made toward evaluating the requirements of the Division at the Agency Repository. A memo was prepared restating the requirements for offset press facilities and several new items of equipment were ordered for storage at the Center. A meeting attended by members of the Logistics Office, GPO - State, D/B, and D/GC, reviewed the problem of film positives and resulted in a possible solution to storage of NIS map negatives at the Records Center. The problem of the NIS negatives was primarily coordinated by D/B.

C. Problems

Efforts were continued during the month to justify larger press facilities for the Special Support and it is hoped that efforts will be continued to bring this problem to the attention of those responsible for this facility. No other problems of note require reporting at this time.

D. Other

It should be reported at this date that since the Executive Order of 19 December 1953, regarding reclassification of Restricted maps, the Division has reclassified approximately 800 maps and it is estimated that another 500 need to be reviewed and reported on. This represents a considerable block of man-hours. Results of these reclassifications are officially reported to the Map Library who, in turn, reports them to the Agency Classification Control Officer.
