Agenda

Equipment Board

Meeting No. 1-63

DATE : ⁶ February

TIME : 1400

PLACE : OC Conference Room
2D03 Hqs. Building

OLD BUSINESS

None

NEW BUSINESS

Agenda Item No. 1: Procurement of HP-12 Reproducers

Spotmaster reproducers are now in use at medium speed base installations for playing back recorded medium speed transmissions. These reproducers have no rewind, fast forward, or variable forward speed capability and are, therefore, unsuited to the task. It is intended that these reproducers be replaced and additionally, to provide compatibility between the guard and contact positions, that the BT-7 recorders be replaced with cartridge recorders/reproducers. In order to accomplish this and to provide reproducers for future medium speed installations, the procurement of ³⁵ HP-12 Reproducers and ¹⁰⁰ associated CA-12 cartridges is recommended.

Agenda Item No. 2: Procurement of CO-11 Coders

The CO-11 is a typewriter coder which allows the rapid placement of traffic on magnetic tape cartridges for later transmission via medium speed. It is intended for use at installations where medium speed transmissions are used as part of the emergency staff communications capability and where traffic volume may be high. For this purpose, the procurement of 40 CO-11 coders is recommended.
