NSCD 8

NTP

Provide most effective, timely and economic exploitation of photography and remote sensory products. Also charged w/ providing certain additional support to the Intell Comm.

Hex-Oct 70

" NPIC will maintain a back-up capability to the MPR. In the event the MPR cannot be made available, NPIC will develop ephemeris + frame data based on telemetry tapes provide from [] and actual film formats. This info will be made to all MPR recipients. STAT

Corres:

Memo from TOPOCONS dtd 6 Oct 69 - [] STAT

Reply by ACK dtd 25 Nov 69 - If telemetry fails, NPIC will read all the time data blocks on the SI photography.
