Gentlemen:

During a visit to Expo '67, we were quite impressed about the quality of the rear projection screen which is being used for display purposes. Since we are starting to work in different display areas, we would like to find out more about the properties of screen materials. [redacted] of the Czechoslovakia exhibit recommended that we should get directly in contact with you to find out more about your "MARATA DISKS".

May I ask you to send me the technical data, delivery time, price, etc., of such screens. Is there a distributor of your material here in the United States? I would appreciate if you could supply us also with a small sample with which we could do our own measurements - the size of one square inch would suffice.

Please feel free to answer this letter in the German language. I am looking forward to hearing from you at your earliest convenience.

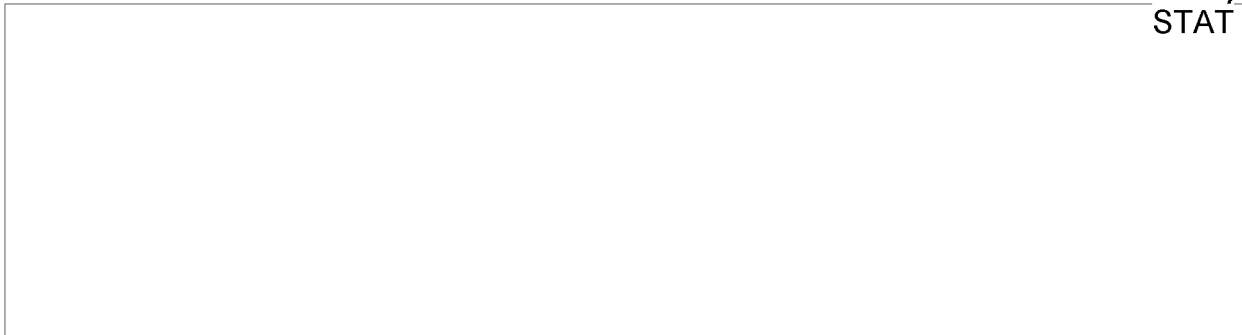

Sincerely yours,

[redacted]
