MEMORANDUM FOR THE UNITED STATES INTELLIGENCE BOARD

SUBJECT : National Intelligence Survey (NIS) Production
Schedule for FY 1972

REFERENCE: USIB-M-504, 11 April 1968

1. In accordance with the reference, the NIS Committee submits herewith the NIS Production Schedule for FY 1972.

2. Because of resource limitations, Coasts and Landing Beaches units have not been programmed for FY 1972. The Ports and Naval Facilities volumes have been replaced by single-sheet publications, which treat each port separately and thus make possible easier and more rapid maintenance. Similarly, a single-city publication has been developed for urban area coverage.

3. In the General Survey, a new sequence of presentation has been adopted to assist readers seeking a broad appraisal of the country as well as those looking for reference data on military or other specialized topics.

4. Production of General Surveys for FY 1972 continues at 30. At present, 73 detailed sections are scheduled, representing a 12% reduction from FY 1971; in addition, 45 port sheets and 28 urban area studies are programmed. The schedule will be critically reviewed throughout the year and may require adjustment because of manpower and budgetary restrictions.

JOHN KERRY KING/J
Chairman, NIS Committee
